

DRUMGRANGE VACANCY ADVERT

NETWORKS ENGINEER

LOCATION: CHERTSEY

JOB PURPOSE

Drumgrange is seeking to expand its team and are looking for a competent Networks Engineer to work with the team providing network support and services on project and operational tasks. The work will include designing and implementing network solutions whilst maintaining network security, technical governance, and legislative compliance.

REPORTING TO: PROJECT MANAGER

CANDIDATE REQUIREMENTS

- Responsible for maintaining the network infrastructure through remote management, static routes, managed switches and firewalls.
- Ability to install, integrate and maintain file server, SQL Server, Remote desktop Services and Remote applications with IIS, Command Line Interface and Power-Shell scripting for the project.
- The ability to design and implement new network solutions to improve resilience and performance.
- Provide Active Directory and Group Policy Management within the systems.
- You will work and communicate at all levels, with internal and external stakeholders as part of a collaborative enterprise with other companies
- Working independently and collaboratively as part of a wider multi - site team.
- Provide support to the business development team and preparation of technical proposals when required and be able to handle sensitive information in the course of your work.
- Able to evaluate, mitigate and manage networking risks across projects.

Location: Chertsey	Role: Permanent	Hours: Full Time 37.5 Hours
Contact: Jestina Anderson HR Manager	Email your CV to: careers@drumgrange.com	Phone: 01932 581100 Vacancy Nos': P0054C
